

Product: F-profile Kick plate for 38 mm grating

100 mm kick plate for 38 mm grating

The F-profile is a pultruded profile from fire retardant isophthalic polyester for fixing to typical 38 mm deep (1,5") grating by adhesive / bolting.

The F-profile has a total height of 152 mm (6") providing a kick plate of 100 mm above the grating surface.

The profile can be used as kick plate around the rim of a grating surface to avoid objects from falling outside.

Can be used to tie grating profiles together at locations where cutouts for penetrations are required.

Is also suitable as kick plate at rear edge of stair treads.

Dimensions

Profile height	:	152 mm
Unit length	:	6 m
Height, (above grating)	:	107 mm
Opening, (for the grating)	:	39 mm
Thickness	:	6,4 mm
Weight	:	2,5 kg/m
Colour	:	grey
Resin	:	isophthalic polyester
